

# GREENLEAF - HVACR

Greenleaf Coil Cleaner effectively cleans and deodorizes evaporator coils, heating coils, condenser coils, window units, air filters, blowers, and other dirty HVAC components. Greenleaf Coil Cleaner is safe for all metal, including aluminium.

Condenser Cleaner is a heavy-duty alkaline foaming cleaning that cleans heating and refrigeration coils, fins and fan blades. As the foam breaks down, it carries away dirt, dust, grease, oil and other residue. Cleans heating and cooling coils, fins and fan blades.

Greenleaf condenser cleaner Does not contain dangerous Hydrofluoric Acid nor any acids what so ever.

Greenleaf leak detection fluid/spray pinpoints both small/slow and fast/large leaks from any pressurised gas system easily and quickly clings to vertical surfaces. Apply Greenleaf leak detection fluid full strength on pressurised fitting to be tested. Bubbles will appear at location of gas leak. Low pressure leaks will produce smaller and slower forming bubbles. After testing, allowing parts to air dry is not a problem as Greenleaf leak detector does not contain any corrosive components.

Greenleaf Coil and Duct Deodoriser Disinfectant Biocide is an all in one spray that disinfects all air conditioning ducting surfaces and coils whilst also deodorising with a natural eucalyptus fragrance.

Kills disease causing bacteria as well as mould, fungi and mildew. Also helps to cure bad odours and sick building syndrome.

Greenleaf Ice machine cleaner is a biodegradable cleaner that is specially formulated for removing scale deposits from ice machines having nickel-plated or tin-plated evaporators.

A High performance ice machine cleaner and powerful scale remover Environmentally friendly leaves no acidic residue, eliminating the risk of hazardous liquid spills

Nickel safe, fast acting, easy to use

Aquacide QLF is a non-oxidizing biocide formulated for the control of bacteria, algae and fungi in recirculating industrial water cooling systems, evaporative condensers and air wash systems.

Can also be added to refrigeration drip and condensate trays to control algae and bacterial growth.
